

Saudi Government Revenues and Expenditures Analysis (2016–2025)

Executive Summary

This report analyzes Saudi Arabia's government revenues and expenditures between 2016 and 2025 to evaluate fiscal performance, examine revenue composition, and identify government spending priorities. The analysis provides insights into key financial trends that shaped the country's fiscal position over the decade.

Government Revenues vs. Expenditures

Insight

Government revenues exceeded expenditures only in 2022, resulting in the only budget surplus during the study period. The return of deficits in subsequent years indicates that sustaining fiscal balance remains a long-term challenge.

Budget Balance Analysis

Insight

Budget deficits were recorded in most years between 2016 and 2025, with 2022 representing a temporary improvement in fiscal performance rather than a sustained trend.

Oil vs. Non-oil Revenues

Insight

Although oil remained the dominant source of government revenue, the consistent growth in non-oil revenues reflects continued progress toward a more diversified and resilient revenue structure.

Share of Oil and Non-oil Revenues in Total Revenue

Insight

The increasing share of non-oil revenues and the declining share of oil revenues indicate gradual progress in reducing dependence on oil over the study period.

Government Expenditure by Sector

Insight

Government expenditure remained concentrated in the Military, Education, and Health & Social Development sectors, reflecting the country's long-term strategic spending priorities.

Conclusion

Between 2016 and 2025, Saudi Arabia's fiscal performance experienced notable changes. While 2022 marked the only budget surplus during the period, budget deficits returned in the following years as expenditure exceeded revenues. The analysis also highlights steady growth in non-oil revenues and a gradual shift toward a more diversified revenue structure. At the same time, government expenditure remained focused on strategic sectors, particularly defense, education, and healthcare, reflecting national development priorities over the decade.
